

HIGH QUALITY CAD DRAWINGS TIME AFTER TIME AFTER TIME

The quality of your CAD drawings does more than simply make the project run more smoothly and efficiently - as an integral part of your work your drawings also say a lot about you.

- CAD DRAFTING
- BUILDING SERVICES CO-ORDINATION
- AS INSTALLED AND RECORD DRAWINGS
- HOSTED DRAWING SERVICES
- BUILDING SERVICES SURVEYING
- MEASURED BUILDING SURVEYS
- PAPER TO CAD CONVERSIONS

CAD SERVICES is committed to maintaining the highest standards of quality in every aspect of our work, through on-going training of staff and continual improvement of processes and routines - so you don't have to.

Rather than diverting your resources to ensure consistent drawing quality, you can let us take care of your CAD production while you focus on your core business.

CAD SERVICES leads the field in outsourced CAD support and has vast experience of converting a wide range of mark up and source files, of variable quality and style, to produce a consistent end product - time and time again.

Consistent style, consistent accuracy and consistent quality

A STANDARD TO WORK TO

CAD SERVICES prides itself on having a flexible philosophy, our highly experienced CAD operators will work to the style and quality that you require. As a result, you save time - because you then receive drawings that are ready to use, with no need for 'cosmetic' modifications to bring them up to scratch.

PLUS, if you wish, we will issue our own published Standard Symbol libraries to your staff to assist them in creating uniform mark-ups - reducing mark-up time and achieving better results.

OR, if you prefer, we will use your own standard drawings, enhance them to your requirements and provide you with your own, bespoke, symbols library.

We can also include links to manufacturers' websites including technical data in the electronic copies of the drawings, saving even more time.

SAVINGS EVERY STEP OF THE WAY

- We will work with you to enhance your own processes and resources, optimising work flow and, if required, incorporating your own symbol libraries.
- Optimised AutoCAD performance through extensive in-house customisation of standard templates, menus, blocks and CAD libraries.
- ISO9001 Quality-controlled workflow processes

- Constant checking for accuracy and quality.
- Reduced wastage.
- Increased drawing output.

The result is that you save time and money, with higher quality and improved cost per drawing.

CHRIS ROWE, DIRECTOR.
SLENDER WINTER PARTNERSHIP

"CAD SERVICES have provided consistent quality, on time and within budget, which we feel has also enhanced our company's service and performance"

HOW MUCH HELP

We work with Building Services Consultants and Contractors in a way that suits them, from a single project basis through support of fluctuating in-house workloads to handling the entire drawing office function.

By using CAD SERVICES' symbol libraries you can also relieve the constant headache of training your new CAD recruits to produce drawings to your own standards.

Whether you are outsourcing all of your CAD work or just calling on specialist expertise during peak workflow, you can rely on a consistent approach every step of the way. Our reputation has been built on helping clients to maintain and enhance theirs.

A FLEXIBLE APPROACH TO SUIT YOUR NEEDS

The key to successful outsourced CAD services is flexibility; the flexibility to tailor services to 'fit' your existing business processes, while consistently producing high quality drawings at a sensible, transparent cost.

DON'T JUST TAKE OUR WORD FOR IT

At CAD SERVICES we are passionate about our product and rightly proud of the standards we achieve, so why not visit us at www.cadservices.com and take a look at some examples of our work.

HELPING YOU WORK SMARTER

This information bulletin is one of a series produced by CAD SERVICES to demonstrate how we can help you use CAD more productively and more importantly - profitably.

GET IN TOUCH

It's very easy to find out how we can help, just call Kevin Murtha or Darren Vallance on: **01268 242800**
